

LAWN FOOD 10-2-5

Specifically formulated fertilizer for all types of lawns. It is complete nutritional package with all macro and micro nutrients which are essential to normal functioning of plants. Both quick and slow release nutrients are blended in LAWN FOOD which ensure steady & continuous feeding to lawn, hence, vital for vibrant growth throughout growing season.

TURF ORGANIC BLEND (6-2-5+2Fe)

ORGANIC TURF BLEND is an excellent fertilizer for organically grown grasses. However, it can also be used for conventional purposes. Apart from NPK its organic ingredients provide all essential nutrients and supplements needed for lush green and vibrant grass growth. It is designed to produce high quality results and steady growth over a long period of time. Iron (Fe) helps increase in chlorophyll production, colour intensity and check moss build up.

ORGANIC BLEND (9-2-7)

An excellent, high Nitrogen (N) fertilizer for organic crop production. Nitrogen (N) in the product is both from quick and slow release sources. It is a complete nutritional package that contains all macro and micro nutrients which are essential to normal functioning of plants. It is especially good for organic vegetable production.

STARTER FOOD (1-3-15)

It initiate robust rooting during early growth stages which helps in efficient use of nutrients leading to a good crop stand. It is a mixture of organic nutrients, supplements and naturally occurring minerals.

SUMMER BLEND (6-2-7)

It is designed to meet high nutritional needs of plants during summer period when growth is at its maximum. It ensures continuous supply of nutrients and helps crop to reach optimum yield potential. It is suitable for use in organic production in soil/soil-less medium for all crop plants. A complete food package containing NPK, fortified

with Calcium, Magnesium, Sulphur, micronutrients and a wide range of supplements. As a supplement it can also be used in soil mixes.

ROCK PHOSPHATE (0-3-0)

Most soils are deficient of Phosphorus, therefore, to obtain superior quality of produce its addition to soil is must. ROCK PHOSPHATE is a good organic source of Phosphorus (P) and contains fair amount of wide range of minerals. It helps in building stronger root system, especially in roses. Its addition to compost enriches it with valuable nutrients for plants use.

BIO-COMPOSTER

Bio-Composter is an organic product to speed up decomposition and break down of organic waste by increasing microbial activity. It helps produce high grade compost rich in minerals and nutrients within a short period of time. Composting initiatives by municipalities as well as home owners is on the rise. Bio-Composter converts home and yard waste into rich organic manure that can be used to grow chemical-free food.

Note: We carry wide range of other organic products. For further details please visit www.agrisolinc.com or call us.
